Partial Interval Recording Data Sheet

Student: _____ **Behavior:** _____

Staff: _____ **Setting:** _____ **Week of:** _____

Definition: _____

Partial interval: mark an interval if the behavior happens at any time during it, even briefly. Partial interval tends to overestimate how much of the time the behavior occurs. Interval: 10 s · Observation: 10 min · 60 intervals per observation.

Observation 1 **Date:** _____ **Start time:** _____ **Observer:** _____ **Activity:** _____
